Introduction

Congratulations on the purchase of your new CHAUVET lighting effect. We are confident you will enjoy many trouble-free hours with this unit. To assist with the care and use of the product, we have prepared this short guide.

Operation

This lighting effect has been designed to function on a mains power supply of either 120V~60Hz or 230V~50Hz and has been supplied with a suitable power adapter for use with your local voltage. Check the label on the adapter for the correct voltage. Simply connect the COLORsphere™ to the power adapter and plug in. When connected the COLORsphere™ should illuminate.

The COLORsphere™ is an RGB color changing unit. It utilizes long life LED's to illuminate. The four position switch found on the base gives the user for a choice of steady color (red, green or blue) or a slow constant changing of color. This will allow the desired ambiance to be created.

The LED's utilized by CHAUVET have an expected lifetime of approximately 10,000 hours.

Installation / Mounting

The COLORsphere™ has been designed to either sit upright, be wall mounted or hung. With supplied chain

The COLORsphere™ may also be wall mounted. Place two screws into the wall being certain that they align with the keyholes on the base. The COLORsphere™ is then simply placed onto the screws.

Cleaning

The Body of the unit may be cleaned with a soft damp cloth. We recommend that a qualified technician carry out internal cleaning only.

Maintenance & Servicing

There are no user serviceable parts inside. Contact CHAUVET for servicing.

Troubleshooting

- If the unit does not illuminate - check that main power supply is 'on' and that the unit is properly connected to the power adapter.
- If after trying this solution, you still have a problem contact CHAUVET.
